THE VOICE FOR
THOSE WHO'VE
EARNED IT.

An Important Message from the Founder of Generation America

I am a small businessman, having owned and operated my own businesses since 1974. Thanks to hard work and our amazing free enterprise system I have been successful. I have lived the American Dream.

Recently, I have watched our government grow and spend money at an unprecedented rate. This administration and Congress has tripled deficit spending; our national debt is approaching 12 trillion dollars.

Health care "reform" was just the catalyst for me.

Obviously, the current administration is dedicated to expanding the role of government control in our lives in many areas. My commitment to the free market system and to small, efficient government and personal freedom has been reignited by the unprecedented efforts to expand the government's role in our lives.

Generation America is committed to the founding principles of our Great Nation. We are committed to small government, low taxes, personal responsibility and FREE MARKETS.

We are self-funded. We accept no money from corporations, companies, large donors, political action groups or parties.

There is strength in numbers. We cannot do this alone and we need your help. Please, **STAND WITH US**; together we can change the course of America.

Sincerely,

Michael Young
Generation America

Why Should You Join?

We advocate for you. We are the voice for those who have earned it. Generation America has spearheaded a mission to speak out in support of individual liberty and freedom for all Americans. Our team is working tirelessly to communicate these ideals, protect our rights, and promote free-market solutions rather than government intervention to the current challenges we face.

We offer member services. We strive to provide our members with the best services available. Our dedicated team is constantly looking for new partners and the best opportunities. As we grow we are adding services such as custom travel, retail, insurance, financial services, legal, and more.

We're living it up. We are developing a variety of unique activities and opportunities that speak to the thriving lifestyles of our members. From offshore fishing to art, music, theater and travel — our enrichment programs are specially designed to reflect the passions and interests of our members.

We educate. We believe in educating our members and the youth of America about our unique history, American exceptionalism and free market economics. Our program is being developed to inform, celebrate American success and inspire our members and the youth of America. We believe this will have a positive effect on securing the future of our country.

With your help, we can do more. Join Generation America today!

Advocacy

Generation America has spearheaded a mission to speak out in support of individual freedoms for all Americans. We are doing this through vigilant advocacy and through communication and community building. Our team is building a strong presence in Washington on behalf of our members, which is advocating for free-market solutions rather than government intervention to the current challenges we face.

What are we advocating for?

Freedom. Personal Freedom is the cornerstone of life in America. We are fighting to protect our freedom from government interference, government takeovers and government control of our private lives. We believe in a government that answers to us; instead of a government that demands answers from us.

Healthcare. This is the single most pressing issue the over-50 generation faces today. We are advocating in favor of a free-market health care system where individuals have the freedom to determine the level of healthcare they want, the doctors they want, the medicines and treatments they want and to make their own end-of-life decisions.

Fiscal Responsibility. The new administration is spending money at an unheard of rate. The deficit is growing at a frightening pace and the National Debt is being pushed to unimaginable levels. We promote lower taxes, the creation of jobs through the private sector, support of small businesses, cutting the national deficit, working towards a balanced budget and putting an end to government bailouts.
