Dr. Phyllis Johns

**Re: Medications for Janice Freeland - D.O.B. of 12/10/1939**

Dear Dr. Johns

Your patient, Ms. Janice Freeland, has requested that we contact you regarding her current prescriptions and their costs.

EquivaMeds is a professional on-line resource created by physicians and business managers to inform patients and their physicians about safe, lower-cost equivalent medications. By identifying less costly medications, patients are more likely to sustain their physicians' prescribed medications, and benefit from a more effective health care treatment.

As Ms. Freeland's physician, you know what is best for her and you are the only person qualified to approve medication changes. We are glad to facilitate your patient's request by identifying less expensive alternative medications for you to consider. Itemized below are medications you prescribed for Ms. Freeland, along with lower-cost alternative medications and their projected savings. If you determine that the alternative medications are appropriate, you could help Ms. Freeland transition to a safe, less expensive alternative, which could result in a potential savings to her of up to \$74.16 per month or \$893 per year.

Medication & Dosage	Estimated Annual Savings
Current Medications / <b>Potential Alternatives</b>	
Brand Drug 0.3MG TABLET	
<b>Equivalent Drug One 0.75MG TABLET</b>	\$893.00
<b>Equivalent Drug Two 0.5MG TABLET</b>	\$635.00

Ms. Freeland is eager to hear your recommendations regarding medication alternatives. If she is not contacted by your staff, we have encouraged her to call you in the next few days.

Thank you for your attention to this matter. For more information regarding EquivaMeds, visit us online at [www.EquivaMeds.com](http://www.EquivaMeds.com).

Sincerely,

Your EquivaMeds Team
